

WG4: LCY-039

Items for Discussion for Joint Meeting between WG4 and WG2

16/Nov/2009

Items for Discussion

1. Project Title of SQL/MM Part 8
 - Metadata Registry (MDR)
 - Recognized conflict between WG 2 and WG 4
 - Metadata Query Language (MQL)
 - Rejected in the Jeju Plenary, June 2009
 - **Registry Query Component (RQC)**
 - **Registry Access Component (RAC)**
 - **MDR Access**
 - **Metadata Registry Access (MRA)**
 - **Reg. Access**

Items for Discussion (cont.)

2. What should be the target registry
(11179-3 Ed.2 and Ed.3)

Items for Discussion (cont.)

2. Target Registry (11179 Ed.2 and Ed.3)

- Korea Suggestion : We need to maintain the current scope of SQL/MM-8 and keep developing its 1st edition. Then, after ISO/IEC 11179-3 3rd edition is standardized, we'd better revise the 1st edition of SQL/MM-8. The reasons we made such decision are follows:
 - ISO/IEC 11179-3 3rd edition is under development
 - SQL/MM-8 can be easily revised to cover the 3rd edition of ISO/IEC 11179-3
 - The others such as the parts of ISO/IEC 20944 are based on ISO/IEC 11179-3 (ed. 2)

Items for Discussion (cont.)

3. Does WG2 have a list of incompatibilities between 11179-3 Ed.2 and Ed.3?

Items for Discussion (cont.)

4. Scope of SQL/MM Part 8
(Common part + Specialization?)
 - e.g., 11179-3(MDR), 19763 all Parts(MFI), 19773(MDR modules)

Items for Discussion (cont.)

5. Business Scenarios for Querying of Registries
 - WG 2 progress report?
 - Standardized data requirement for business scenarios?

Items for Discussion (cont.)

6. To what extent should Part 8 recognize the conformance levels defined by 11179-3?

Items for Discussion (cont.)

7. Should the Part 8 project be progressed by regular WG4/2 joint meeting or formation of collaborative group?
