

THE STATUS OF PROCESS MODELS IN 19763

(UK NATIONAL BODY POSITION)

1. At the meeting held in Kunming (19-28 May 2010) the editor's representative for 19763-5 agreed that the scope of 19763-5 should include all process models, including business process models. At the study group meeting held in Wuhan (26-27 August 2010) the scope was reset to include only those features of process models that are required to identify services.
2. It is the view of the UK National Body that the broadest possible scope for process models should be maintained.

Keith Gordon (7 November 2010)
