Template for comments and secretariat observations — Date: 2014-05-30 — Document: DIS 19763-10 — Project:

MB/NC[1]	Line number (e.g. 17)	Clause/ Subclause (e.g. 3.1)	Paragraph/ Figure/ Table/ (e.g. Table 1)	Type of comment[2]	Comments	Proposed change	Observations of the secretariat
CA01	135	Foreword	Part 11	Ed	Part 11 was cancelled, so should be removed from the list of parts.	Make the correction.	
CA02	411-414	9.2	second bullet item	Te	The list of types applicable to Models should be expanded. Also, it is unclear what 'the latter' refers to.	Rewrite the paragraph as: "Most instances of **Model** should be instances of **Registered_Item**, but there are exceptions. For example, in ISO/IEC 19763-3 instances of **Registered_Ontology_Whole** will be instances of **Registered_Item** while instances of **Unregistered_Ontology_ Whole** will not be registered, by definition." Those instances of **Model** which are registered will more likely be **Administered_ Items**, rather than **Attached_Items.**	
CA03	415-420	9.2	third bullet item	Te	The list of types applicable to Model_Elements should be clarified. Also, it is unclear what 'the latter' refers to.	Rewrite the paragraph as: "Most instances of **Model_Element** should be instances of **Registered_Item**, but there are exceptions. For example, in ISO/IEC 19763-3 instances of **Registered_ Ontology_Atomic_Construct** will be instances of **Registered_Item** while instances of **Unregistered_Ontology_ Atomic_Construct** will not be registered, by definition." Those instances of **Model_ Element** which are registered might be **Administered_Items** in their own right, but are more likely to be **Attached_Items**, attached to the **Administered_Item** that represents the containing **Model**.	
CA04	425	9.2	New	Te	Add a new bullet to describe the applicability of Designatable_Item.	Add the following new item: "Instances of any of the metaclasses might be instances of **Designatable_Item**, allowing them to be defined and or designated (named)."	

1   **MB** = Member body / **NC** = National Committee (enter the ISO 3166 two-letter country code, e.g. CN for China; comments from the ISO/CS editing unit are identified by ******)
2   **Type of comment:**   **ge** = general   **te** = technical   **ed** = editorial

ISO/IEC/CEN/CENELEC electronic balloting commenting template/version 2012-03
